As a testament to the development team at EA SPORTS FIFA, developers have used the AI Data within motion capture for the first time in franchise history. The AI system's 100+ new variables - ranging from ball flight and spin to movement, ball retention, player connection, and player speed - add new layer of strategy to create the most realistic-looking football matches to date. Each new behaviour is informed by the data and statistics collected during real-life match play. A new online director tool is also introduced which allows managers to track the data of the best and the worst players, how they perform in key moments of the game and how best to switch players in game situations to minimize fatigue. The new "Skill Stick" represents the beauty and art of footy and can be used to experience real-life skill and accuracy. Players can use the Skill Stick to: - Feed the ball through defenders and find space, - Bend the ball with the most realistic passes, - Shooting accurately or heading the ball - Land on your preferred foot for your favorite shot. A detailed Player Performance Indicator (PPI) provides a detailed statistical breakdown of the player's performance and, in addition, gives a unique insight into the performance of players during on-pitch situations.

Gamescom Live Stream:
Watch FIFA World Cup Qualifying Online - 26 Aug 23:00 local (BST)
A link to the livestream will be posted as soon as it is available on OBS, Sling TV, AT&T, DirecTV, YouTube and Twitch.

MAIN FEATURES: FIFA 22 introduces "HyperMotion™ Technology" to give fans the most realistic-looking game on Xbox One, the PlayStation®4 and PCs. Using the full match data from a 22-player motion capture suit and a 3D camera, FIFA 22 delivers the most authentic player movement and behaviour. "With FIFA, we've provided the most immersive experience to fans," said Aaron McHardy

Fifa 22 Features Key:

- Live out your dreams as both a manager and a player in FIFA 22, where you define your own path.
- HyperMotion Technology powers the highly-anticipated FIFA gameplay engine, including every tackle, edge of your foot and shot, displayed on a new "Element" panel that makes up the main HUD. See the ball from your opponent's point of view, the defender's telltale signs of anticipating your next

move, the referee's angle of call and the block that was missed in slow motion.

- A comprehensive new single player experience, featuring replay modes inspired by FIFA Ultimate Team.
- A new Career Mode, where your Pro's story-line and scenarios are shaped by a new player-driven experience.
- Spend your FIFA Ultimate Team GPs to unlock your players' Ultimate Edges.
- FIFA is the first football game to feature gameplay specific to the Pitch, with the Community Team recovering throws from dead balls and maintaining possession after unsuccessful throw-ins.
- New 3D player models, for players of all heights, and improved appearance-based facial animations.

Football is the best game in the world. It's the most popular sport in the world, and the only one that people of all different cultures and countries play in the exact same way. It's been played on grass since 1871, and no-one can be sure how it started as the rules are so different from country to country. But football is where we all come from, and where we want to go. In FIFA, you become the star footballer of your dreams. Control realistic players and lead your favourite teams to glory. Features New Free Kick Wizardry: Free-kicks are the last line of defence for your team, and you'll now be able to save your fortune using the Free Kick Wizard. "Risk and reward" - the choice is yours. Find new and improved free kicks and goal scoring opportunities with goal celebrations more intuitive and refined than ever before. Mix and match between the different types of Free Kick to help you maximise your scoring opportunities. Intuitive and intuitive to use, Free Kick Wizard is also a staple of the new Big Moments Moments. Where a shot from the half-volley, a long-range chip, or a low drive for a corner might be the only way to win a game, at least you'll know you had the technique to give yourself a fighting chance. New 4P Control: Short, Middle, Long, and Panoramic control are now available in the new "play as you pass" mode of 4-Player Control. This is a hugely welcome innovation that allows players to play in any fashion they see fit - there's no longer any need to conform to a prescribed set of rules for your team. To create the best player control experience possible, FIFA's artificial intelligence has been adjusted to see if the player is likely to control the ball in a certain way, and to adjust its behaviour accordingly. Intelligent Kick Reward: With players smarter than ever, FIFA now works out if your player is likely to kick the ball in a certain way, and if so, presents the appropriate intelligent rewards. Opportunities to use the new 4P mode are invaluable, but in the world of FIFA, they're not without their risks. By tracking your tendencies, FIFA will now reward you for intelligent play, understanding that your biggest rewards are often more hazardous than simply following the

prescribed play. Massive Customisation: It's no longer bc9d6d6daa
